

# Second Project

## Prototype Concept

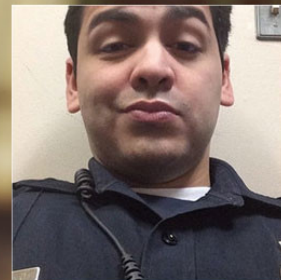

Mobile phones are a convenient way to connect with our loved ones, friends and family. How can we switch the perspectives of individuals based on the conversations we hold privately with the people who matter most to us? We explored a intimate narrative through the exchanging of words we communicate everyday.

The goal of this prototype is to invite users to put on a new perspective on their mobile phones. We selected 4 people who come from diverse backgrounds and documented their every day conversations through phone calls and text messages.

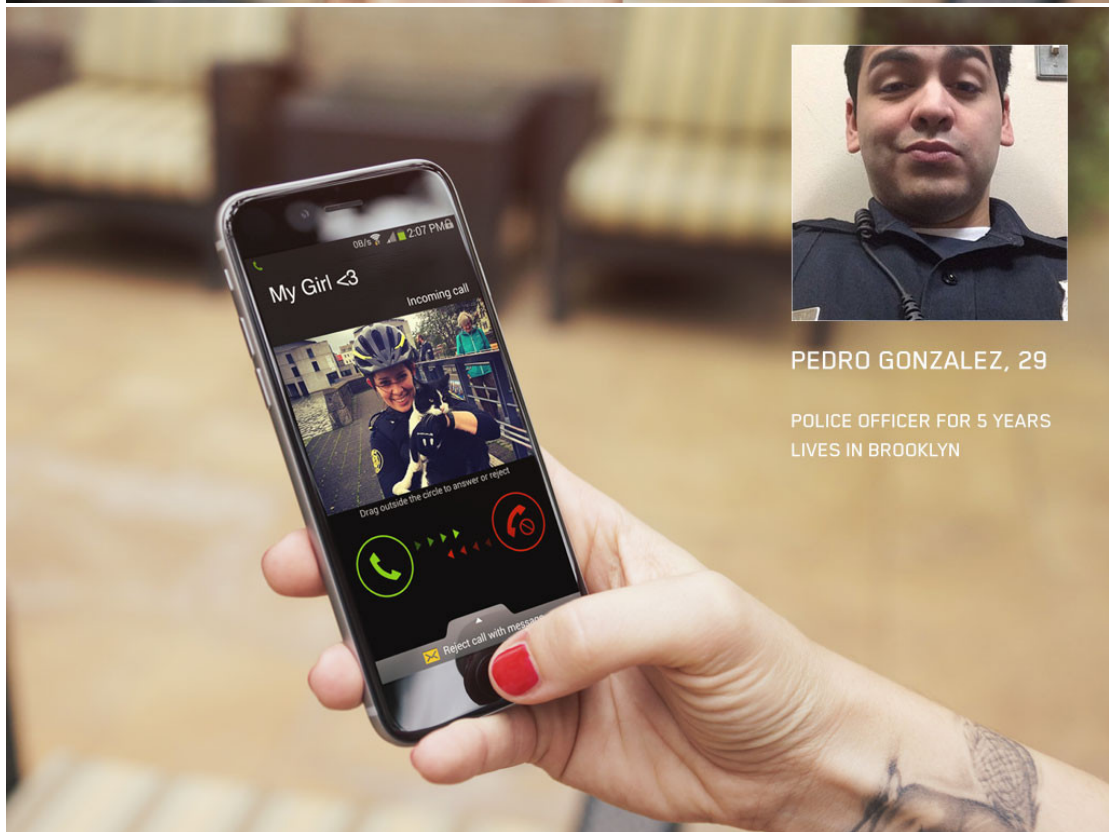

BRANDON WILSON, 26

CAB DRIVER FOR 2 YEARS  
LIVES IN THE BRONX

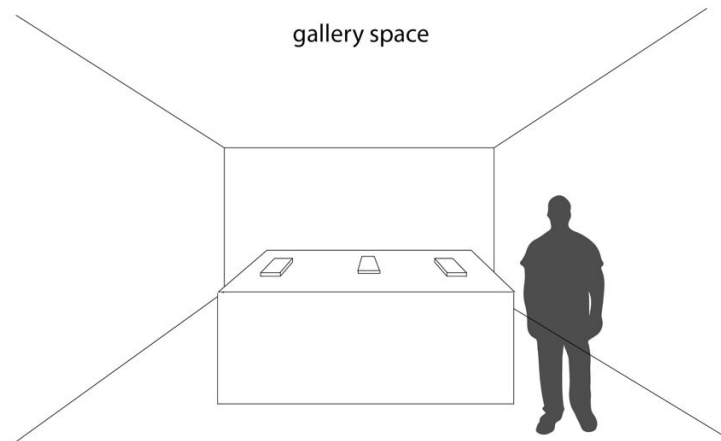

PEDRO GONZALEZ, 29

POLICE OFFICER FOR 5 YEARS  
LIVES IN BROOKLYN

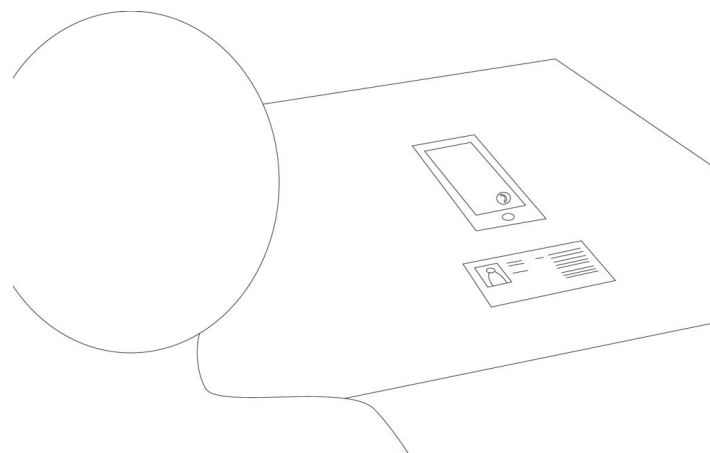

## User Scenario

1. User enters exhibition room. There are 4 RFID tagged phone cases placed on a table, accompanied by short descriptions of 4 individuals' backgrounds.

2. User selects character of choice.

3. User puts on case at the back of their own mobile phone, it triggers phone calls and messages at various time intervals.

PUT ON A NEW PERSPECTIVE

RFID TAG + PHONE SLEEVE

TRIGGERS PHONE CALLS  
AND CONVERSATIONS BASED  
ON SELECTED INDIVIDUAL

4. They listen to the conversation that is being held and receive text messages that are being communicated to the selected character.
